

Product description:

ISO high gloss roof painting is used on asbestos cement and concrete roof tiles, where you wish a very exclusive look on your roof. The roof will be beautiful and shining and will also get extra good abilities against growth of moss and alga.

Directions of use:

Before applying the roof must be cleaned carefully with ISO roof cleaner. There must be no dirt, alga, and moss. Apply the ISO Roof Primer, which is a special painting in the same colour as the ISO high Gloss roof painting, you want to apply. The best result is achieved by spraying.

When the ISO Primer has dried after app. 1-3 hours (depending on temperature and RH) ISO high Gloss Painting can be applied.

When the priming has been done, it is necessary to apply the ISO high Gloss Painting twice.
