

StoneCleaner Extrem™

Universal cleaning product for mineral surfaces, etc.

Product description

Liquid, highly concentrated universal cleaning detergent with a high level of solubility on oils, grease, dirt and other forms of impurities on mineral surfaces of concrete, brick, etc.

Contains biodegradable anionic and non-ionic tensides, etc. carefully selected for effectiveness and for being gentle to the user and nature.

Use

Universal use for both manual and mechanical application as well as an additive in water through a high-pressure cleaner.

Used for cleaning mineral surfaces such as concrete, brick, etc., in public places, streets and pavements, industrial flooring, driveways and terraces with pavement blocks. Further uses include façade, tile roofs, concrete and fibrecement and wooden surfaces.

After cleaning it is important that the cleaned surface is carefully washed with water to remove all residues of StoneCleaner.

If the surface is subsequently treated with an Iso product, such as Stone-Color, HydroBlock, ProCover or ConGuard, make sure that the surface is completely dry.

Dosing

In extreme cases, StoneCleaner Extrem can be used undiluted and be allowed to remain on the surface for a few minutes before starting to rinse with a water hose or with a low-pressure water cleaner. However, under normal circumstances it can be used in concentrations as low as 1 part to 50 parts of water where it is still very effective.

Technical data:

Consistency: Liquid aqueous universal cleaning detergent. **Colour:** Natural/colourless **Smell:** Slightly soapy **Density:** Approx. 1.06 grams per ml. **PH:** Approx. 12.7 **Dilution:** From concentrated to diluted 1 part to 50 parts of water **Working temperature:** From 5 °C to 35 °C. **Cleaning:** Working tools and low-pressure water jet cleaner should be thoroughly rinsed with water. **Storage:** Store frost-free and out of reach of children.

Benefits

High resolution against oils, grease, dirt and other forms of dirt.

Gentle for the user and nature.
