

ProCover® Turbo

Product description

New, unique and extremely effective! This is the new product for the protection of buildings, facades, concrete and tiles – in other words, ideal for the construction industry. This product has a self-cleaning effect which protects against pollution and dirt, e.g. on facades, pavement stones and terraces providing effective protection for stone surfaces. ProCover Turbo is a water-based anti-stick cover for absorbant mineral materials and protects against water, oil and grease. ProCover Turbo is a product from the world of nano-technology.

It simplifies the removal of ice (in winter) and prevents the development of algae and other growths.

Use

Terrace paving, paving stones, courtyard entrances, car parks, paved drive-ways, staircases, facades, roofs, artificial stone, concrete ceiling elements, facades, concrete blocks, bricks, facade stones and other kinds of concrete constructions.

The product can be applied with a low-pressure spry gun, a roller or a brush. In the case of a low-pressure pump use a maximum pressure of 4 bar. Do not apply the product in the form of an atomised spray. The surface should be clean and dry. In order to obtain the best effect, apply the product so heavily that it penetrates the surface; if further treatment is necessary, then apply this wet-on-wet since the surface cannot be re-impregnated once it is already dry. The final result can be observed after approx. 7 days. Make sure the surface is clean and dry before applying ProCover Turbo.

Please make a test to ensure compatability with the surface.

Technical Data

Colour: Colourless. **Drying time:** Approx. 1 hour at 20°C. **Yield:** Approx. 2-25 m²/l, depending on absorption factor. Example “concrete paving stones” – approx. 1 litre ProCover for 5 m². **Application:** Brush, paint-roller or low-pressure spray gun. **Dilution:** The product is supplied ready-to-use. **Cleaning:** Clean all tools etc. immediately after use. Wash in warm, soapy water. **Package sizes:** 25 litres. **Storage:** Dry, frost-free and out of the reach of children.

Benefits

Based on the latest nano-technology and scientifically engineered to cover and protect surfaces

Water, dirt, oil and stain repellent

Use for facades, concrete elements, pool areas, shopping areas ... all thinkable mineral surfaces

Improves strength, durability and look

Breathable, invisible, self-cleaning, water vapor permeability, smooth coating

Less maintenance and cost
